

# Lab: Async JavaScript with Promises

## Content

1	Promises .....	1
---	----------------	---

## 1 Promises

1. Take a look at the shown example.
2. Similarly, introduce a loadByName method in your PassengerManager that loads passengers via HTTP. To do this, use the following URL: <http://www.angular.at/api/passagier?name=Muster>.
3. To view the (few) existing test entries, you can call this url without parameters.
4. Call this method in your application and present the results.
5. Test your solution.
